

HD 445

Tractor for heavy-duty applications

HD 445

The HD 445 tractor is used for the transportation of very heavy loads and special transports in steel mills, foundries, seaports and other industries. It is also possible to operate hydraulic lifting trailers and drawbar trailers.

The HD 445 is equipped with the latest models of environmentally friendly Mercedes and Cummins engines with power ranges from 190 kW up to approx. 280 kW. The design ensures the safe and cost effective transport of heavy loads in all working conditions; no matter if the tractor operates in industrial or seaport applications.
